Accelerometer Installation Tool Kits

PRODUCT PURPOSE

All the Tools You Need for Permanent, Self Installation of Sensors

Avoid the high costs of sub-contractors by using this safe, do-it-yourself kit. The kit features a ratcheting tap handle for ease of installations.

Accurate Drills a pilot hole for a 1/4 - 28, 10 - 32 or M6 x 1 threads perpendicular to a milled face, in the same operation.

Fast Mill and drill in the same operation.

Reliable High speed steel and carbide tipped versions available.

Economical High speed steel models may be re-sharpened for extended tool life. Resharpen to a 4° top bevel.[†]

Versatile For use with portable hand drills.

[†]Resharpening of Installation Tools is not covered under warranty. To resharpen, CTC suggests sending your tool set to a qualified machine shop with instructions to resharpen to a 4° top bevel.

SPECIFICATIONS

Overall tool length:	3 1/4"	(82,55 mm)				
Sharft Diameter:	3/8"	(9,53 mm)				
- M6 Version:	3/8"	(9,53 mm)				
- M8 Version:	1/2"	(12,7 mm)				
Recommended Drill Speed: 300 - 600 RPM						

To permanently install accelerometers, simply set the drill depth according to the number of threads you wish to tap. To prepare the surface of machinery for adhesive mounting pads, simply back the drill depth off to a minimum, and use this tool to prepare a clean flat surface to adhere to. All tool kits are supplied with (3) stub length carbon steel drill bits.
